

CATALOGUE OF THE OSTEOLOGICAL SPECIMENS IN THE COLLECTIONS OF THE ZOOLOGY DEPARTMENT OF LIVERPOOL MUSEUM

Vignette of visitors to the skeleton display at the Paris Museum.

Articulated Chimpanzee skeleton, from the Otter Collection.

The collection presented to the Liverpool Museum in 1961 by Guy Otter had belonged to his grandfather, Sir Edmund Loder (1849-1920), and is an immaculately prepared series of 200 skulls and skeletons. A separate listing of the specimens from the Otter Collection can be found in the Donor index at the end of this catalogue.

FOREWORD

This catalogue documents the 3,600 osteological specimens held by the Zoology Department of the Liverpool Museum, part of National Museums and Galleries on Merseyside (NMGM). In recent years, the collection has been rehoused and catalogued, and is now available for consultation by visitors to the Department.

The publication of this catalogue has involved contributions from many members of staff at NMGM - in particular those of the Zoology Department, the Information Technology Unit, and the Design Section. The work has been co-ordinated by Dr Clemency Fisher, Curator of Birds & Mammals at Liverpool Museum. Dr Fisher's particular interest is in the identification of bird bones from archaeological excavations, and, as a consequence, the collection now contains a strong reference series of bird skeletons, many prepared by NMGM's taxidermy staff.

This catalogue reflects NMGM's scholarly objective of raising awareness of, and improving access to, the reference collections. I am sure that the publication of this catalogue will bring knowledge of Liverpool Museum's osteology collection to both scientists and artists in the international community who require a rich fund of source material for their work.

Richard Foster, Director, NMGM.

INTRODUCTION

BY CLEMENCY THORNE FISHER,

Curator of Birds & Mammals, Liverpool Museum.

The osteological collection at Liverpool Museum amounts to about 3,600 specimens. Most of the material is housed in 36 wooden osteological cabinets, which were purpose built (many in-house) over several years. They measure 220cm high, 93cm wide and 77cm deep and have a varying number of wooden drawers according to the height needed for the specimens stored. Eight of the cabinets are divided vertically down the centre so that they take half-width drawers; these were designed for the smaller specimens such as the birds and rodents. There are also mammalian skulls with associated skins in the study skin collection, which is now housed in metal cabinets. A few specimens of awkward size are stored with the larger mounted mammals in a separate storeroom. All these cabinets and storage areas are on the Upper Horseshoe Gallery of the Liverpool Museum, but some osteological specimens are in use on the floor above by the Natural History Centre or are on display on the Natural History Gallery. One of our most famous specimens - the skeleton of Ambush II, the Prince of Wales' horse and the Grand National winner of 1900 - is on display in the Museum of Liverpool Life.

The curation and restorage of the osteological collection has taken place over the last 20 years. In 1975 the collection was housed in a jumble of large cardboard boxes, in no particular sequence, on dexion racking covered with plastic sheeting - making access impossible for either staff or visitors. The game heads (which were piled on the top rack) were the first to be removed, cleaned, mounted on plinths and then hung on racking; a position far less hard on their ears. They now hang in sequence, covered with a moveable canopy. They include mounted skulls and antlers as well as trophy skins.

As the new osteological cabinets became available, the specimens were removed from the large boxes bit by bit, each piece being cleaned, mended, identified and properly labelled. Nearly all the specimens are now in individual cardboard boxes, of suitable size, with a further protective plastic bag and with a cottonwool lining if necessary. These boxes, which are covered with acid-free paper, have been made for us over the years, in specified sizes, by North-West Box Makers of Stockport. Both the lid of the box and the specimen itself are clearly labelled with scientific name, form of specimen and the accession number.

In many cases the specimens were not registered and therefore, for inventory purposes, have been given a current accession number; thus the preponderance of recent dates associated with the specimens (for instance, some specimens are clearly marked as being from the collection of Lord Derby, which came here in 1851, but they were not accessioned and are now marked 198x.xxx etc). Many specimens were identified and their catalogue entries found after massive detective work involving such clues as pencil scribbles, green scalloped labels, or the method used to wire articulated skeletons together. Scraps of paper in the bottom of a particular box full of items could sometimes be re-united with the correct specimen by a process of elimination, or even by matching the hole in the label with the string-knot left on the specimen. One particular jigsaw puzzle was a large card, on which several bird sterna had been glued above their labels and from which they had fallen. After many hours work each had been matched up with the marks left on the card by the original glue, which could be fitted to traces left on the bones themselves. The value of this endeavour only emerged later, when it transpired that two of the sterna were all that remained of the types of *Caprimulgus tamaricis* Tristram and *Kakatoe citrino-cristata* Fraser.

This catalogue must be seen as a working list, with undoubtedly many inaccuracies which will be rectified in subsequent editions. But the advent of in-house desk-top publishing has made it possible to produce such an interim list in an attractive and readable fashion.

NOTABLE PARTS OF THE COLLECTION.

All the specimens are stored in an amalgamated taxonomic sequence arranged by various check list orders for different classes; for instance the order in Honacki's *Mammals of the World* (1982) was followed for that particular section, Peters' *Birds of the World* (1932-1987) for the birds. The catalogue follows the same taxonomic order for genus, followed by species in alphabetical order, but a purely alphabetic index of current scientific names is also provided. The catalogue also includes complete donor, collector and locality indices arranged alphabetically.

Perhaps the most important collection is that of the XIIIth Earl of Derby, whose seat at Knowsley Hall near Liverpool housed in the early 19th Century a most spectacular and comprehensive collection of live mammals and birds. He also commissioned specimens from collectors all over the world for his museum at the hall; into this museum too went the prepared skins and skulls of animals from the menagerie. This collection was bequeathed to the City of Liverpool upon the Earl's death in 1851 and indeed founded this institution. The details of the specimens have been amalgamated with the others in the catalogue's taxonomic sequence, but this historically notable and varied material is also cross-referenced as a sequential list in the donor index.

Undoubtedly the collection with the most osteological style is that of Mr Guy Otter, presented to the museum in 1961. The collection had belonged to his grandfather, Sir Edmund Loder (1849-1920), and is an immaculately prepared series of 200 skulls and skeletons. Many of these originated from the Loder's menagerie in the grounds of Leonardslee, their

home in Sussex. We recently managed to track down Guy Otter, now in his eighties, at his home near Poole. He was delighted that his collection should prove such an important part of this catalogue and gave us valuable background information on the specimens, such as the fact that a number of the game heads from the Otter collection are in Rowland Ward's *Records of Big Game*. We also spoke to Sir Edmund Loder's great-grandson, Mr R.R. Loder, who lives adjacent to the original house at Leonardslee. He told us that wallabies still live there, but the colony of beavers that had been the pride of the menagerie died out after the breeding females were given to the London Zoo. However, the beaver restraining fence can still be seen. Mr Loder remembers seeing mouflon and capybara in the grounds; Guy Otter particularly recalled the Rocky Mountain goats.

The Otter collection, which came to us through the recommendation of the world deer expert Mr G.K. Whitehead, can also be seen as a sequential listing in the donor index.

Other interesting specimens include those of Canon H.B. Tristram, of Durham Cathedral, who sold his main collection of birds to the Liverpool Museum in 1896. There are also specimens from the time of the Liverpool Free Public Museum, immediately after the museum was founded.

The point of separation between Geology and Zoology at the Liverpool Museum has been somewhat clouded in the past; some specimens drifted between the two departments until a policy decision was made in the early 1980s; all post-4,000 Bp material (marking a distinct local change in sea-level) was to be held in Zoology. Thus we immediately received a trolley piled with drawers which included the Kendal collection of cave material, mostly from Helsfall Point, and given to our safekeeping by Kendal Museum in 1960. A complete list of this collection can be seen in the donor index.

USES OF THE COLLECTION

The uses of the collection are very wide, and have expanded remarkably since the collection became accessible and documented. Perhaps the most common use is for education; the specimens are much more robust than other museum specimens and are thus ideal for teaching and display. It is interesting to look back after over fifteen years' successful operation of the Liverpool Museum's Natural History Centre, and remember that the first trial "hands-on" session in 1982 used osteological specimens; they are still a great stalwart in the Centre. One of the most popular specimens has been the "Build the Badger" puzzle - involving reconstructing a badger skeleton. The specimens are also used extensively by the two Liverpool universities for teaching, both for natural sciences and veterinary courses.

Many artists use the specimens; the clean lines provide an ideal model for still lifes and our specimens are immortalized in many portfolios. However, the scientific uses of the specimens are paramount and many are prepared with archaeological work in mind. The least fallible way to identify an archaeological bone is by direct comparison with a bone whose provenance is certain; thus the bird osteology collection has been built up over the last ten years to include all common British birds past and present. The collection is used by Chester Museum's Field Archaeology Unit to identify their excavated material, and many other archaeological reports have been based on our material. One of the sources of income for the department has been the contracts undertaken by the Curator of Birds & Mammals on the identification of bird bones from archaeological excavations.

ACKNOWLEDGEMENTS

This catalogue would not have been possible without the help of a great many people. The most important of these is Tony Roberts, an archaeo-zoologist and natural curatorial ferret, who has, in several periods on contract to the museum, curated the main bulk of the mammal and lower vertebrate specimens. It was he who made the connection between green labels, "Leonardslee" and the Otter collection, and who located the family responsible for the specimens.

I would also like to acknowledge the work that Tony Parker (Assistant Curator, Vertebrates) and Phil Phillips of the Information Technology Department have both done, particularly in using their expertise in computing techniques to help prepare this database for publication. Professor Robert Roaf, a retired orthopaedic surgeon, spent several years helping to document and accession the collection. Others have helped greatly with the identification of specimens, notably the Mammal and Bird Sections of the Natural History Museum in London. I would also like to thank Valerie Evans, Malcolm Largen, George McInnes and Ian Wallace of NMGM for their help with this catalogue.

USING THE CATALOGUE

The main part of the collection and catalogue are arranged in the same order as the following check lists:

Honacki, J.H., Kinman, K.E. and Koepl, J.W. 1982. *Mammal species of the world*. Allen Press.

Peters, J.L. 1931-1987. *Check list of the birds of the world*, vols. I - XV. Harvard University Press.

Format

Each specimen has a separate data-base entry, and the information is arranged as follows:

- Genus & species; authority and date of description
- Accession (registration) number. Sex.
- Form of specimen
- Locality where specimen was collected
- Collector's name
- Date of collection
- Donor or seller of specimen
- Date of acquisition by the museum. Notes

The following abbreviations and terms have been used.

Accession numbers:

- D. - specimen from the XIIIth Earl of Derby's collection.
- F.P.M. - specimen from the Liverpool Free Public Museum.
- T. - specimen from the collection of Canon H.B. Tristram.
- 1963.173.- collection of Mr Guy Otter.

Institutions:

- LIVCM - Liverpool Museum
- N.H.M. - The Natural History Museum, London.

Form of specimen:

- Antler: antler only.
- Antlers.
- Horn: horn only.
- Horns.
- Mandible: mandible only.
- Mandibles.
- Skull: skull and mandibles only.
- Skulls.
- Skeleton: skull and complete skeleton.
- Skeletons.
- Skeletal: post cranial material only.
- Skin & Skull: cabinet skin, skull & mandibles.
- Tooth: tooth only.
- Teeth.
- Tusk: tusk only.
- Tusks.

MONOTREMATA

TACHYGLOSSIDAE

1 *Tachyglossus aculeatus*
(Shaw, 1792)
Accession number: 11.11.62.2
Form: skeleton
Tasmania, Australia.
Donor: Australian Commission. 1862
Remarks:
Mounted by Professor Hynth of Vienna. Partially dismantled. Other Australian specimens purchased that day but no longer extant; 4 thylacines, 1 boomer kangaroo, 1 cuscus.

2 *Tachyglossus aculeatus*
(Shaw, 1792)
Accession number: 17.12.79
Form: skeleton
Southern New Guinea.
Collector: Lawes, W.G.
Donor: Lawes, W.G. 17/12/1879

3 *Tachyglossus aculeatus*
(Shaw, 1792)
Accession number: 1979.100
Form: skull
Australia.
Remarks:
Skull broken.

4 *Tachyglossus aculeatus*
(Shaw, 1792)
Accession number: 1979.95
Form: skeleton
Australia.
Donor: Deyrolle, E.
Remarks:
Mounted. Per Deyrolle: Naturaliste, 23 Rue de la Monnaie, Paris.

5 *Tachyglossus aculeatus*
(Shaw, 1792)
Accession number: 1979.99
Form: skull
Australia.
Remarks:
No mandibles.

6 *Zaglossus bruijnii*
(Peters & Doria, 1876)
Accession number: 16.12.86.1
Form: skeleton
New Guinea.
Donor: Gerrard, E. 16/12/1886
Remarks:
Skeleton has only 1 front and 1 back leg. Mostly dismantled.

ORNITHORHYNCHIDAE

7 *Ornithorhynchus anatinus*
(Shaw & Nodder, 1799)
Accession number: 1979.101
Form: mandibles
Australia.

8 *Ornithorhynchus anatinus*
(Shaw & Nodder, 1799)
Accession number: 1989.123.11
Form: mandible
Remarks:
Right mandible only.

9 *Ornithorhynchus anatinus*
(Shaw & Nodder, 1799)
Accession number: 23.12.65.5
Form: skull
Australia.
Donor: Gerrard, E. 23/12/1865
Remarks:
No mandibles. Also "503" written in ink on skull, not referred to in Derby Stock Book.

10 *Ornithorhynchus anatinus*
(Shaw & Nodder, 1799)
Accession number: 28.12.65.1
Form: skeleton
Australia.
Donor: Gerrard, E. 28/12/1865
Remarks:
Skeleton partly disarticulated.

MARSUPIALIA

DIDELPHIDAE

11 *Didelphis marsupialis*
Linnaeus, 1758
Accession number: 1979.90
Form: skull
America.

12 *Didelphis marsupialis*
Linnaeus, 1758
Accession number: D.568
Sex: male
Form: skeleton
Bolivia.
Collector: Bridges, Thomas.
Donor: 13th Earl of Derby. 1851
Remarks:
Obtained from Bridges, 19th July 1850.

13 *Didelphis marsupialis aurita*
(Wied, 1826)
Accession number: 1963.173.1
Form: skull
Rio Grande Do Sul, Brazil.
Donor: Otter, G. 7/1963

14 *Didelphis marsupialis aurita*
(Wied, 1826)
Accession number: D.266
Sex: female
Form: skull
Bolivia.
Collector: Bridges, Thomas.
Donor: 13th Earl of Derby. 1851
Remarks:
Derby Osteology Catalogue No. 76. Labelled *Didelphys azarae* (Temm.). Skull measurements indicate the species to be *marsupialis*, not *albiventris* (of which *azarae* is a synonym). No skin extant.

15 *Didelphis marsupialis aurita*
(Wied, 1826)
Accession number: D.266e
Juvenile
Form: skull
Bolivia.
Collector: Bridges, Thomas.
Donor: 13th Earl of Derby. 1851
Remarks:
Derby Osteology Catalogue No.76.a. Labelled *Didelphys azarae*, but see comments for D.266. Per Bridges. Skin not extant.

16 *Didelphis virginiana*
Kerr, 1792
Accession number: 1979.91
Form: skull
America.
Donor: Cross, W?
Remarks:
Front of jaw area much diseased. Label states: "skull of white opossum (pur'd) by Mr. (Cross's)" (most of label unreadable).

17 *Didelphis virginiana*
Kerr, 1792
Accession number: A8.9.1926.1
Sex: male
Form: skeleton
Donor: Rogers, H.E. 8/9/1926

18 *Didelphis virginiana*
Kerr, 1792
Accession number: A9.8.98.33
Sex: male
Form: skin & skull
Catamalea, Sinaloa, Mexico.
Collector: Simons, P.O. 11/6/1897
Donor: Gerrard, E. 9/8/1898

19 *Didelphis virginiana*
Kerr, 1792
Accession number: A9.8.98.33.a
Sex: female
Form: skin & skull
Tasimaleo, Sinaloa, Mexico.
Collector: Simons, P.O. 24/5/1897

Donor: Gerrard, E. 9/8/1898
Remarks:
From the collection of W.W. Price.

20 Didelphis virginiana
(Kerr, 1792)

Accession number: D.400

Form: skin & skull

Southern Mexico.

Donor: 13th Earl of Derby. 1851

Remarks:

Obtained from Bruzon, 18th July 1848.

21 Marmosa elegans
(Waterhouse, 1839)

Accession number: D.269a

Form: skull

Chile.

Collector: Bridges, Thomas.

Donor: 13th Earl of Derby. 1851

Remarks:

Derby Osteology Catalogue No.78.

Per Bridges October 1844. Skull labelled 79 - this refers to another specimen, so skull has been renumbered in ink. Skin mounted but destroyed in war.

22 Marmosa elegans
(Waterhouse, 1839)

Accession number: D.269b

Form: skull

Chile.

Collector: Bridges, Thomas.

Donor: 13th Earl of Derby. 1851

Remarks:

Derby Osteology Catalogue No.78.a.

Per Bridges October 1844. Skull labelled 79.a - this refers to another specimen, so this skull renumbered in ink. Skin mounted but destroyed in war.

23 Marmosa robinsoni
Bangs, 1898

Accession number: 14.12.97.7

Sex: male

Form: skin & skull

Savannah Grande, Trinidad.

Collector: Rendall, Dr P. 10/2/1897

Donor: Gerrard, E. 14/12/1897

24 Metachirops (Philander) opossum
(Linnaeus, 1758)

Accession number: A28.11.1900.2

Sex: female

Form: skin & skull

Paramba, Ecuador.

Collector: Miketta, R. 29/4/1899

Donor: Dublin Museum. 28/11/1900

Remarks:

Topotype of *P. o. melanurus*

(Thomas, 1899). Types collected 1897.

25 Metachirops (Philander) opossum
(Linnaeus, 1758)

Accession number: A28.11.1900.2.a

Sex: male

Form: skin & skull

Paramba, Ecuador.

Collector: Miketta, R. 13/2/1900

Donor: Dublin Museum. 28/11/1900

Remarks:

Topotype of *P. o. melanurus*

(Thomas, 1899). Types collected 1897.

26 Metachirops (Philander) opossum
(Linnaeus, 1758)

Accession number: D.263

Form: skull

Bolivia.

Collector: Bridges, Thomas.

Donor: 13th Earl of Derby. 1851

Remarks:

Derby Osteology Catalogue No.79.

Labelled *Didelphys zuica* (North).

Purchased from Bridges 17th

December 1847. From mounted

specimen D.263, this no longer extant.

27 Metachirops (Philander) opossum
(Linnaeus, 1758)

Accession number: D.263a

Form: skull

Bolivia.

Collector: Bridges, Thomas.

Donor: 13th Earl of Derby. 1851

Remarks:

Derby Osteology Catalogue No.79a.

Labelled *Didelphys zuica* (North).

Purchased from Bridges 17th

December 1847. From mounted

specimen D.263a, this no longer extant.

28 Metachirus nudicaudatus
(Geoffroy, 1803)

Accession number: D.569

Form: skin & skull

Donor: 13th Earl of Derby. 1851

Remarks:

Obtained from John Gould, July 1846.

29 Metachirus nudicaudatus
(Geoffroy, 1803)

Accession number: D.570

Sex: male

Form: skull

South America.

Donor: 13th Earl of Derby. 1851

Remarks:

Derby Osteology Catalogue No.81.

Labelled *Didelphys*. Wrongly provenanced as from New South Wales. Skin no longer extant.

DASYURIDAE

30 Antechinus flavipes
(Waterhouse, 1838)

Accession number: D.571

Form: skull

Swan River, Western Australia.

Collector: Leadbeater, J. 1840

Donor: 13th Earl of Derby. 1851

Remarks:

Derby Osteology Catalogue No.82.
Labelled *Antechinus*. Purchased from Leadbeater. From mounted specimen, removed from No.325.

31 Dasyurus maculatus
(Kerr, 1792)

Accession number: D.203a

Sex: male

Form: skull

Tasmania, Australia.

Donor: 13th Earl of Derby. 1851

Remarks:

Derby Osteology Catalogue No.73.

Purchased from Mr. Maddox in June 1838. Skin mounted but probably destroyed in war.

32 Dasyurus viverrinus
(Shaw, 1800)

Accession number: 19.8.75.16

Form: skull

Australia.

Donor: Cutter, W. 19/8/1875

Remarks:

Described in Stock Book as "mammal skull".

33 Dasyurus viverrinus
(Shaw, 1800)

Accession number: A15.11.1920.2

Sex: male

Form: skin & skull

Australia.

Donor: Rogers, H.E. 15/11/1920

34 Dasyurus viverrinus
(Shaw, 1800)

Accession number: D.257

Sex: female

Form: skin & skull

Donor: 13th Earl of Derby. 1851

Remarks:

Died at Knowsley Menagerie, 8th July 1836.

35 Sarcophilus harrisii
(Boitard, 1841)

Accession number: 1963.173.2

Form: skull

Tasmania, Australia.

Donor: Otter, G. 7/1963

Remarks:

Also labelled as *Dasyurus ursinus*.

36 Sarcophilus harrisii
(Boitard, 1841)

Accession number: 1982.688

Form: skull

Australia.

Remarks:

"306" written on cranium in ink.

MYRMECOBIIDAE

37 Myrmecobius fasciatus
Waterhouse, 1836

Accession number: D.44a

Form: skin & skull

Toodyay, Swan River, Western

Australia.
 Collector: Gilbert, John. 1842
 Donor: 13th Earl of Derby. 1851
 Remarks:
 Obtained from John Gould, 8th
 February 1844.

THYLACINIDAE

38 *Thylacinus cynocephalus*
 (Harris, 1808)
Accession number: 1963.173.131
Form: skull
 Tasmania, Australia.
 Donor: Otter, G. 7/1963

39 *Thylacinus cynocephalus*
 (Harris, 1808)
Accession number: A26.9.1910.1
Form: skin & skull
 Donor: Findlay, Captain. 26/9/1910
 Remarks:
 Skull and some limb bones kept with
 skin.

NOTORYCTIDAE

40 *Notoryctes typhlops*
 (Stirling, 1899)
Accession number: A28.8.99.8
Form: skeleton
 Australia.
 Donor: Frank, G.A. 28/8/1899
 Remarks:
 Originally skin and skeleton, skin no
 longer extant.

PERAMELIDAE

41 *Isoodon obesulus*
 (Shaw & Nodder, 1797)
Accession number: 19.8.75.17
Form: skull
 Australia.
 Donor: Cutter, W. 19/8/1875
 Remarks:
 The Stock Book for 1875 records this
 specimen only as "mammal skull".

42 *Isoodon obesulus*
 (Shaw & Nodder, 1797)
Accession number: 1979.123
Form: skull
 Australia.
 Remarks:
 Labelled as *Perameles obesula*.

43 *Isoodon obesulus*
 (Shaw & Nodder, 1797)
Accession number: D.262b
 Sex: male
Form: skin & skull
 Toodyay, Swan River, Western
 Australia.
 Collector: Gilbert, John. 9/8/1842
 Donor: 13th Earl of Derby. 1851
 Remarks:
 Obtained from John Gould, 8th
 February 1844.

44 *Perameles gunnii*
 Gray, 1838
Accession number: 30.8.65.1
Form: skin & skull
 Launceston, Tasmania, Australia.
 Donor: Isaacson, B. 30/8/1865

45 *Perameles gunnii*
 Gray, 1838
Accession number: 30.8.65.2
Form: skin & skull
 Launceston, Tasmania, Australia.
 Donor: Isaacson, B. 30/8/1865

THYLACOMYIDAE

46 *Macrotis lagotis*
 (Reid, 1837)
Accession number: 1979.110
Form: skull
 Australia.
 Remarks:
 Labelled as *Perameles lagotis*.

47 *Macrotis lagotis*
 (Reid, 1837)
Accession number: D.259a
Form: skin & skull
 Swan River, Western Australia.
 Collector: Mangles, J. 2/11/1836
 Donor: 13th Earl of Derby. 1851

PHALANGERIDAE

48 *Phalanger maculatus*
 (E. Geoffroy, 1803)
Accession number: 1979.125
Form: skull
 Australia or New Guinea.
 Collection date: 24/8/1870
 Donor: Otter, G?. 7/1963?
 Remarks:
 Probably Guy Otter Collection (see
Phalanger orientalis No.1963.173.3).

49 *Phalanger orientalis*
 (Pallas, 1766)
Accession number: 1963.173.3
Form: skull
 Australia or New Guinea.
 Collection date: 24/8/1870
 Donor: Otter, G. 7/1963

50 *Phalanger orientalis*
 (Pallas, 1766)
Accession number: 29.7.80.15
Form: skin & skull
 Port Moresby, New Guinea.
 Donor: Lawes, W.G. 29/7/1880

51 *Trichosurus vulpecula*
 (Kerr, 1792)
Accession number: 1.12.77.4
 Sex: male
Form: skull
 Australia.
 Donor: Cross, W. 1/12/1877
 Remarks:
 Labelled as *Phalangista vulpina*.

52 *Trichosurus vulpecula*
 (Kerr, 1792)
Accession number: 19.8.75.21
Form: skull
 Australia.
 Donor: Cutter, W. 19/8/1875
 Remarks:
 Labelled as *Phalangista*. Stock Book
 refers to purchase of "opossum
 skull".

53 *Trichosurus vulpecula*
 (Kerr, 1792)
Accession number: 1963.173.4
Form: skull
 Australia.
 Donor: Otter, G. 7/1963
 Remarks:
 Labelled as *Phalanger orientalis*

Remarks:
1 articulated forelimb.

PROBOSCIDEA

ELEPHANTIDAE

1289 *Elephantidae* sp.
Accession number: 1981.1259
Form: tusk
Remarks:
1 tusk.

1290 *Elephantidae* sp.
Accession number: 1981.1269
Form: tusks
Remarks:
2 pairs of tusks.

1291 *Elephantidae* sp.
Accession number: 1981.1291.a - .e
Form: tusks
Remarks:
2 pairs and 1 odd tusk.

1292 *Elephantidae* sp.
Accession number: 1982.1064.b
Form: tusks
Remarks:
9 tusks.

1293 *Elephantidae* sp.
Accession number: 1982.1073
Form: teeth
Remarks:
12 juvenile molar plates.

1294 *Elephantidae* sp.
Accession number: 1982.1077
Form: skeletal
Remarks:
3 carpals. Left lunare and magnum. Plaster cast (hollow) of left magnum of "Chatham elephant", presumably fossil.

1295 *Elephantidae* sp.
Accession number: 1982.1118

Form: skeletal
Helsfell Point, Kendal, Cumbria,
England.
Donor: Kendal Museum. 1960
Remarks:
May be *Rangifer tarandus* (L.).

Cannon bone, 9 specimens. Post-pleistocene, from cavity or rock fissure on Helsfell Point. See Kendal Museum Catalogue, 1933.

1604 Cervus elaphus

Linnaeus, 1758

Accession number: 60.64.BSB

Form: skeletal

Helsfell Point, Kendal, Cumbria, England.

Donor: Kendal Museum. 1960

Remarks:

Scapula. May be *Rangifer tarandus* (L.).

1605 Cervus elaphus

Linnaeus, 1758

Accession number: 60.64.BSC

Form: skeletal

Helsfell Point, Kendal, Cumbria, England.

Donor: Kendal Museum. 1960

Remarks:

Humerus, 2 specimens. May be *Rangifer tarandus* (L.).

1606 Cervus elaphus

Linnaeus, 1758

Accession number: 60.64.BSD

Form: mandibles

Helsfell Point, Kendal, Cumbria, England.

Donor: Kendal Museum. 1960

Remarks:

May be *Rangifer tarandus* (L.). 3 specimens.

1607 Cervus elaphus

Linnaeus, 1758

Accession number: 60.64.BSE

Form: skeletal

Helsfell Point, Kendal, Cumbria, England.

Donor: Kendal Museum. 1960

Remarks:

May be *Rangifer tarandus* (L.). Cervical vertebrae.

1608 Cervus elaphus

Linnaeus, 1758

Accession number: 60.64.BSF

Form: teeth

Helsfell Point, Kendal, Cumbria, England.

Donor: Kendal Museum. 1960

Remarks:

May be *Rangifer tarandus* (L.). Several teeth.

1609 Cervus elaphus

Linnaeus, 1758

Accession number: 60.64.BSG

Form: antler

Helsfell Point, Kendal, Cumbria, England.

Donor: Kendal Museum. 1960

Remarks:

May be *Rangifer tarandus* (L.). 3 specimens.

1610 Cervus elaphus

Linnaeus, 1758

Accession number: D.(Ost)25

Sex: female

Form: skull

North America.

Donor: 13th Earl of Derby. 1851

Remarks:

Labelled as *Cervus canadensis* Brisson.

Died in Knowsley Menagerie.

1611 Cervus megaceros

(Hart, 1825)

Accession number: 1988.214.101.d

Form: antler

Remarks:

In a crate with vertebrae of *C. megaceros* and 3 bones of *Bos primigenius*, labelled "vertebrae and some damaged limb bones of a large mammal from Hull".

1612 Cervus megaceros

(Hart, 1825)

Accession number: 1988.214.98

Form: skeletal

Remarks:

A-g are complete neck vertebrae, axis shows arthritic grooving on cranial articulation; h & i atlas; j c4. Specimens are from crate from Hull, see 1988.214.101d.

1613 Cervus megaceros

(Hart, 1825)

Accession number: 60.64.BSH

Form: skeletal

Helsfell Point, Kendal, Cumbria, England.

Donor: Kendal Museum. 1960

Remarks:

Left humerus. Post-pleistocene, from cavity or rock fissure on Helsfell Point. See Kendal Museum Catalogue, 1933.

for identification.

3594 *Pisces* sp.

Accession number: 1989.123.136

Form: mandible

3595 *Pisces* sp.

Accession number: 1989.123.137

Form: skull

3596 *Pisces* sp.

Accession number: 1989.123.22

Form: skeletal

Remarks:

Shark, vertebrae

3597 **Pisces sp.**
Accession number: 1989.123.35
Form: skull
 Donor: Higgins, E.T. approx. 1864
 Remarks:
 41 otolith specimens, list in box.
 Other E.T. Higgins donations:
 24.12.63, 15.2.64, 14.7.64, 6.9.64.

3598 **Pisces sp.**
Accession number: 1989.123.42
Form: skull

3599 **Pisces sp.**
Accession number: 1989.123.43
Form: skull
 Remarks:
 4 dentaries, upper and lower of one individual.

3600 **Pisces sp.**
Accession number: 1989.123.45
Form: skull
 Remarks:
 Otoliths, 6 specimens. Species:
Homoprion, *Diadon*, *Tetradon*,
Osphrenemus, *Hapalogemys*, *Eques*?

3601 **Pisces sp.**
Accession number: 24.12.63
Form: skull
 England & North America.
 Donor: Higgins, E.T. 24/12/1863
 Remarks:
 Otoliths from 48 species out of an original 52.

3602 **Pisces sp.**
Accession number: 27.7.68.2
Form: skeleton
 Montevideo, Uruguay.
 Collector: Perry, Captain. 1868
 Donor: Perry, Captain. 27/7/1868
 Remarks:
 "Siluroid". "Same species as
 27.7.68.1". Captain Perry, S.S.
Humboldt.

3603 **Pisces sp.**
Accession number: 6.12.66.2
Form: skull
 Donor: Wright, B.M. 6/12/1866
 Remarks:
 Ray, jaws only.
